

I don't think you should allow LPFM to be prioritized over FM Translators especially when it comes to possibly interfering with the Air 1 Broadcast Signal. I am appalled that any government organization would actually consider allowing anything that would snuff out the already small glow of Positive Radio in many small local communities. My community is small, and we already have limited choices. To cause Air 1 to go away would be devastating to those of us who are trying to ignite a love for Positive and Uplifting radio. You, the FCC, are suppose to be defending these types of stations that want to build up the population and not destroy the minds and thinking of our nations youth. Already the FCC should be condemned for the current atrocities that already plague the airwaves and go uncensored. You are failing, and to allow this thing to happen, where Air 1 and like stations may be boosted, will only ensure the complete failure of the FCC. I think it's great that LPFM stations want a voice, but why can't they just take a frequency not currently in use? DUH! That's a no brainer. Of course, I am only a voting citizen, so what do I know? As an Air 1 supporter, I plead with you to not allow this thing to happen. Children as young as 3 can be seen and heard enjoying the positive music, message, and ministry of Air 1. We could not ask for a better example. The deplorable state of our nations cries for stations like Air 1 to be heard. Don't destroy their signal. Don't let LPFM to take over.
